

Slipstats App: Legal, Compliance, and Copywriting Framework

1. Purpose & Application

This framework provides verified facts, legally sound value propositions, compliant marketing copy, and comprehensive liability disclaimers for the Slipstats developer team and AI coding agents. It ensures that product descriptions are high-converting yet strictly legally compliant under South African law.

2. Core Legal Truths & Evidence under SA Law

To ensure marketing statements are strictly accurate, the AI agent must align all copy with these three core statutory and procedural realities:

- **The Legal Burden of Proof:** Rule 6 of the Maintenance Act 99 of 1998 requires Maintenance Officers to investigate complaints. However, the practical burden of proof rests entirely on the litigant to substantiate income and expenditure. Courts have full discretion to reject unreadable or unquantified electronic submissions if they fail to meet minimum clarity requirements.
- **Electronic Evidence Constraints:** Under Sections 11 and 15 of the Electronic Communications and Transactions (ECT) Act 25 of 2002, data messages and screenshots are fully admissible. However, Section 15(3) mandates that the court assesses their *evidential weight* based on reliability, integrity, and how the information was archived or presented. Chaotic or uncontextualised extractions naturally carry lower evidential weight.
- **Judicial Scrutiny and Discretion:** Magistrates cannot legally 'delegate' or bypass their duty to evaluate evidence. Every financial submission is subject to cross-examination by the opposing party. No software tool can bypass this statutory process.

3. Copywriting Transformations (High-Converting & Compliant)

Risk/Non-Compliant Statement	Legally Compliant & High-Converting Statement
Dismisses disorganized WhatsApp screenshots and shoeboxes of faded receipts.	Saves your case from being stalled or unread. Maintenance courts are overwhelmed; presenting messy, unindexed chats or unquantified receipts risks having your evidence set aside or deprioritised by overextended officers.
Delivers standardized, legally rigorous financial bundles.	Formats your data into a court-ready, indexed financial breakdown. Generates standardized expenditure summaries structured specifically to assist maintenance officers and magistrates during the Rule 6 financial assessment process.

Magistrates and maintenance investigators can review and endorse immediately.

Designed for immediate clarity. Dramatically speeds up review times by providing magistrates and investigators with clear, legible, and chronologically indexed data that stands up to scrutiny.

4. Mandatory Protection & Risk Disclaimers

The following terms must be embedded in the app's Terms and Conditions and on the marketing footer to limit liability if a user's case is dismissed:

General Disclaimer Text: *Slipstats is an administrative, organizational, and data-formatting utility designed to assist users in structuring their personal financial information. Slipstats is not a law firm, does not provide legal advice, and does not replace the counsel of a qualified legal practitioner. The use of this software does not guarantee any specific outcome, speed of adjudication, or the acceptance/endorsement of submitted data by any maintenance court, maintenance officer, or judicial official. The burden of ensuring data accuracy and compliance with court evidentiary rules rests entirely on the user.*
